

Migration services to SchoonerSQL delivered by Ispirer

SchoonerSQL™ is a high-performance, enterprise-grade OLTP database that delivers 99.999% availability with zero data loss and automated failover. SchoonerSQL is 100% compatible with MySQL®, for easy adoption.

Migrating to SchoonerSQL from any MySQL variant (such as MySQL Enterprise, MySQL Cluster, or MySQL Community Edition) is simple and straightforward. Current users of other enterprise databases such as Oracle Database, IBM DB2, and Microsoft SQL Server have also successfully migrated to SchoonerSQL to realize lower total cost of ownership (TCO). The SQLWays product and related services from Ispirer simplify the migration to SchoonerSQL.

SQLWays converts stored procedures, functions, triggers, database schema (DDL) and data from major databases to SchoonerSQL. Besides the server-side business logic, SQLWays also converts SQL queries in front-end applications and scripts. It is also possible to migrate procedures and functions to Java. Proven migration paths include:

- Oracle Database to SchoonerSQL
- Microsoft SQL Server to SchoonerSQL
- IBM DB2 to SchoonerSQL
- Sybase to SchoonerSQL
- Informix to SchoonerSQL
- PostgreSQL to SchoonerSQL
- Teradata to SchoonerSQL
- EnterpriseDB to SchoonerSQL

Conversion Features

The SQLWays tool migrates the following database objects and properties to SchoonerSQL:

Tables and Data

- Converts columns definitions: data types, default values, NOT NULL constraints
- Converts integrity constraints: primary and foreign keys, unique and check constraints
- Converts comments
- Resolves reserved words and identifier conflicts
- Transfers data (including BLOB data types)
- Converts Indexes, Views, Sequences and Synonyms
- Converts Stored Procedures, Functions and Triggers
- Converts application files and scripts

Why SQLWays?

SQLWays and complementary, customized services from Ispirer ensure highly automated, successful migrations at a reasonable cost.

Consistent and Integrated Automation of all Migration Phases:

- Database schema/DDDL, server-side business logic (procedures, triggers etc)
- Data transfer and validation
- Front-end applications and scripts
- Application Conversion

Fast Customization – Fast fixes, custom conversions and optimizations (In most cases, this occurs during a 1-3 day service)

Free Services during Evaluation Phase – Ispirer provides pre-migration consulting during the evaluation phase, before you decide to implement a migration

Useful Development Tools – Easily convert standalone SQL statements, functions, scripts and various code fragments

Flexible Pricing
